Phishing Email Detection & Awareness System

Protect Yourself from Email-Based Cyber Attacks

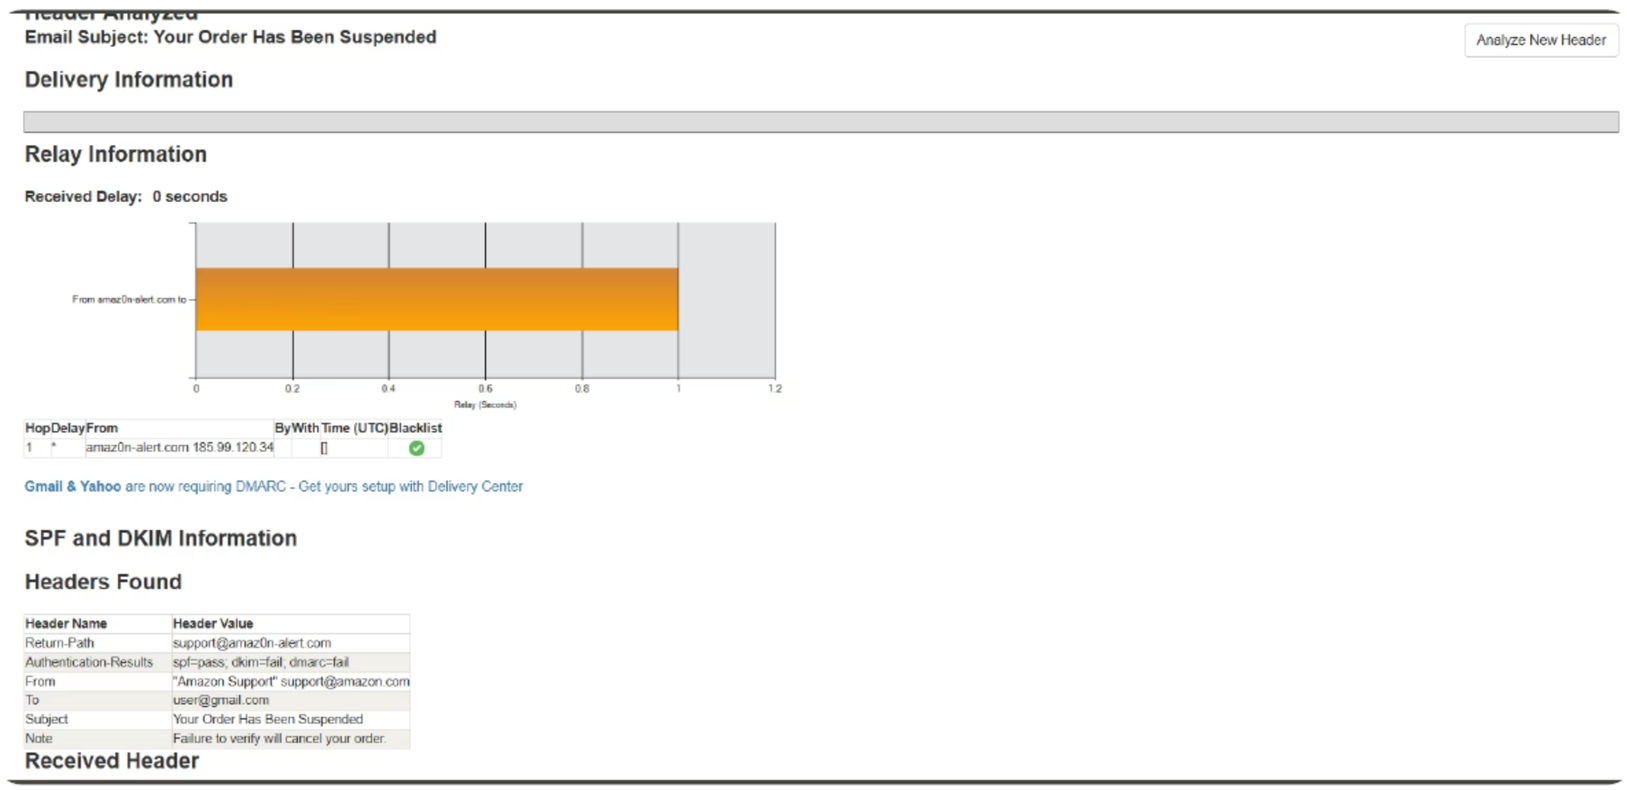
Prepared By: Vimal Raj R

Date: 26 March 2026

What is Phishing?

Phishing is a cyber attack where attackers send fake emails pretending to be trusted organizations to trick users into revealing sensitive information.

These fraudulent messages appear legitimate but are designed to steal your credentials, financial data, or install malware on your device.



Malicious Links

Trick you into clicking URLs that lead to fake websites designed to capture your login credentials

Harmful Files

Encourage downloading attachments that contain malware, ransomware, or spyware

Sensitive Data

Request personal information like passwords, credit card numbers, or Social Security numbers

How Phishing Works

Attacker Sends Fake Email

Impersonates trusted organizations using spoofed sender addresses and familiar branding

User Trusts Message

Victim believes the email is legitimate because it appears to come from a known source

Click or Open File

User clicks malicious links or downloads harmful attachments

Data Stolen

Attackers capture credentials, install malware, or gain unauthorized system access

Email 2: Amazon Account Suspension Scam

Email Overview

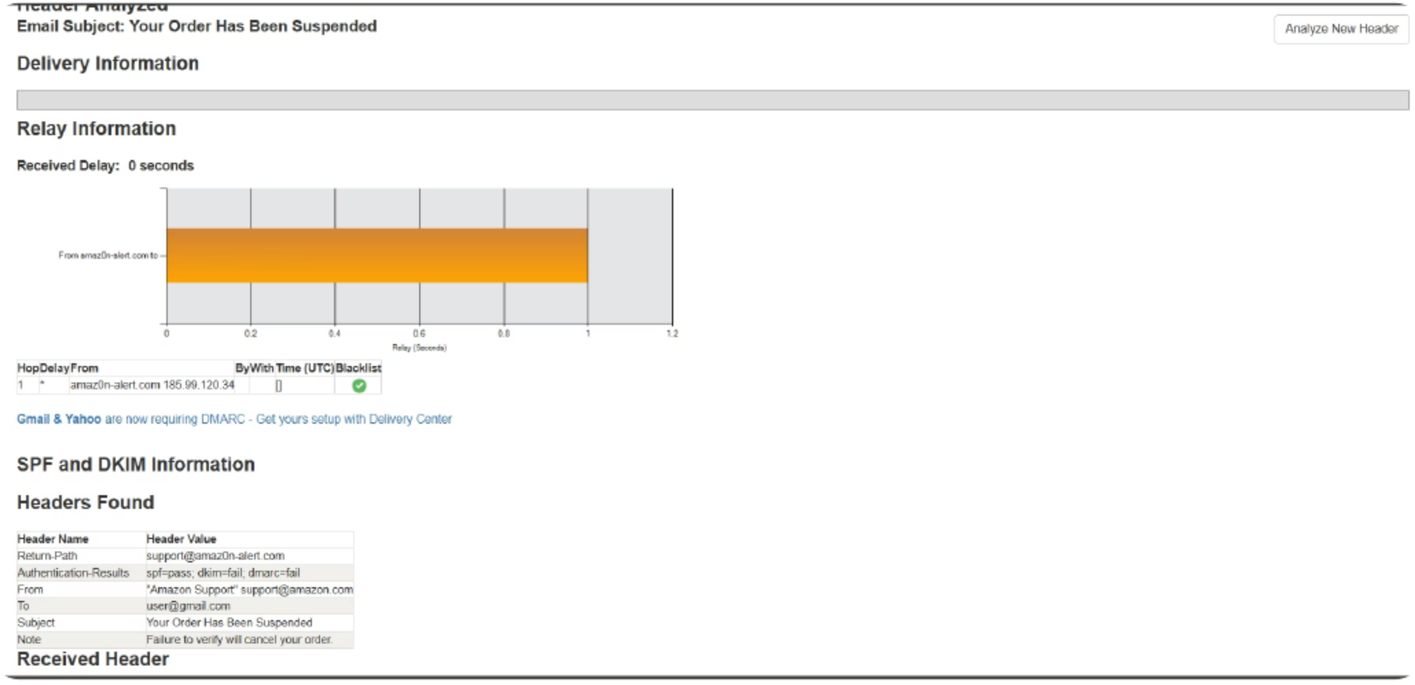
Subject: Your Order Has Been Suspended

Claimed Sender: Amazon Support

Actual Sender: support@amaz0n-alert.com

Type: Credential Theft

Risk Level: High (Phishing)



This email impersonates Amazon and attempts to trick users into verifying their account through a fake login page that captures credentials.

Amazon Scam: Technical Analysis

1

Header Analysis

SPF: Pass (Fake domain allowed)

DKIM: Fail (Email not verified)

DMARC: Fail (Identity mismatch)

2

Domain Analysis

Domain: amaz0n-alert.com

Attack trick: Replacing "o" with "0" to appear legitimate

3

Link Analysis

Link: http://amaz0n-alert.com/login

Fake website designed to steal credentials

Key Indicators

- Sender address mismatch
- Generic greeting
- Urgent warning tone
- Suspicious link

Impact

Account takeover, unauthorized purchases, data exposure

Recommendations

- Do not click email links
- Use official Amazon website
- Verify sender before action

Email 7: Flipkart Gift Voucher Scam

Received Header

```
Return-Path: offers@flipkart-deals.net
Received: from flipkart-deals.net (66.77.88.99)

From: "Flipkart Offers" offers@flipkart.com
To: user@gmail.com
Subject: You Won a Gift Voucher
Congratulations!
You have won a ₹5000 Flipkart voucher.
👉 Claim Now: http://flipkart-deals[.]net/reward
Limited time offer!
Flipkart Team
```

Fake/Spoofed Domain

Impersonating Real Flipkart

Phishing Link

Urgency Tactic

Email Overview

Subject: You Won a Gift Voucher

Claimed Sender: Flipkart Offers

Actual Sender: offers@flipkart-deals.net

Type: Financial Scam

Risk Level: High (Phishing)

This email uses a fake reward to trick users into visiting a malicious website and sharing personal or financial details.

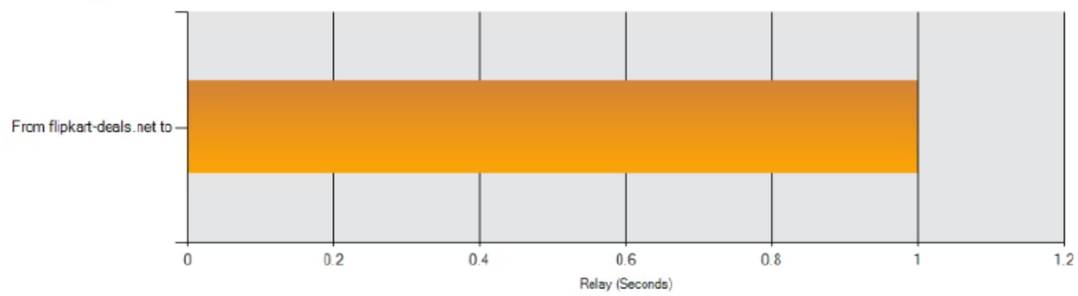
Flipkart Scam: Technical Analysis

Email Subject: You Won a Gift Voucher

Delivery Information

Relay Information

Received Delay: 0 seconds



Hop	Delay	From	By	With	Time (UTC)	Blacklist
1	*	flipkart-deals.net 66.77.88.99			[]	✔

Gmail & Yahoo are now requiring DMARC - Get yours setup with Delivery Center

SPF and DKIM Information

Headers Found

Header Name	Header Value
Return-Path	offers@flipkart-deals.net
Authentication-Results	spf=fail; dkim=fail; dmarc=fail
From	"Flipkart Offers" offers@flipkart.com
To	user@gmail.com
Subject	You Won a Gift Voucher

Email Overview

- **Sender IP:** 66.77.88.99
- **Authentication Status:** SPF ❌ | DKIM ❌ | DMARC ❌
- **Type of Attack:** Financial Scam / Phishing
- **Risk Level:** 🔴 High (Phishing)

This email uses a fake reward to trick users into visiting a malicious website and sharing personal or financial details.

1

"Too good to be true" offer

Unsolicited prize notification without entry

2

Urgency created

"Limited time" warning pressures quick action

3

No personalization

Generic greeting instead of your name

4

Fake domain used

Not the official Flipkart domain

Email 10: DHL Package Delivery Malware

Email Overview

Subject: Package Delivery Failed

Claimed Sender: DHL Courier

Actual Sender: delivery@dhl-tracking.net

Type: Phishing + Malware

Risk Level: High (Critical)

Received Header

```
Return-Path: delivery@dhl-tracking.net
Received: from dhl-tracking.net (155.66.77.88)
Authentication-Results: spf=fail; dkim=fail; dmarc=fail
From: "DHL Courier" delivery@dhl.com
To: user@gmail.com
Subject: Package Delivery Failed
Dear Customer,
Your package could not be delivered.
📎 Attachment: invoice.pdf.exe
👉 Reschedule: http://dhl-tracking[.]net
DHL Team
```

Fake/Spoofed Domain

Impersonating Real DHL

Malware File (.exe)

Phishing Link

This email combines phishing with malware by using a fake delivery message and a malicious attachment disguised as an invoice

DHL Scam: Technical Analysis

Header Analysis

SPF: Fail (Fake sender)

DKIM: Fail (Not verified)

DMARC: Fail (Not trusted)

Domain Analysis

Domain: dhl-tracking.net

Uses "tracking" subdomain to appear legitimate

Link Analysis

Link: http://dhl-tracking.net

Fake tracking website

Attachment Analysis

File: invoice.pdf.exe

Disguised malware file with dual extension

Key Indicators

- Suspicious attachment
- Blacklisted IP address
- Generic message
- Urgent action request

Recommendations

- Never open unknown attachments
- Delete suspicious emails
- Verify delivery via official DHL site

Protect Yourself: Essential Best Practices

Verify Sender Addresses

Check email addresses carefully for misspellings or suspicious domains. Hover over links to see the actual URL before clicking.

Never Share Credentials

Legitimate organizations will never ask for passwords or sensitive information via email. Always go directly to official websites.

Watch for Urgency

Be skeptical of emails creating panic or demanding immediate action. Scammers use urgency to bypass your critical thinking.

Use Security Software

Keep antivirus software updated and enable email filtering. Report phishing emails to your IT department immediately.

Verify Through Official Channels

When in doubt, contact the organization directly through official phone numbers or websites, not through email links.

Stay Informed

Participate in security training and keep up-to-date with the latest phishing techniques and prevention strategies.

Remember: When an offer seems too good to be true, or a situation feels urgent and suspicious, trust your instincts and verify before taking action. Your vigilance is the first line of defense against phishing attacks.
